Login Operation

Login Screen

Login Credentials

The following are the login validations.

- The user should have a Userid in the "User Profile" table.
- Valid password and it should be in force within the password life cycle.
- User record should be in active status.
- Login should be within the login low and high time.
- Should not be disabled.
- Should have a valid "Role Id" for accessing the menu options.
- User can access the menu / screen options according to "Role Id".
- User can perform operations according to the rights available for the "Permissions".
- Application keeps records of login attempts with 'Success' and 'Failure' status.

1. Dashboard

From here, users can access all key modules required for day-to-day operations. Each module is designed to perform specific functions, ensuring streamlined workflow and efficient management.

Below is an overview of the modules available on the Dashboard:

1. Home
2. Admin
3. Audit Inquiries
4. Credit Card
5. Debit Card
6. UPI Debit Card
7. Recon Parameter
8. Print Queue
9. Logout

2. Admin

Admin Module enables the creation and management of application users while ensuring secure access control. It provides the flexibility to assign roles, enforce compliance standards, and maintain operational efficiency, making it adaptable to evolving organizational requirements

- User profile
- Access and Role
- Bank Branch Master
- Reference Code

2.1. User Profile

In the User Profile module, you can create a new user in the Recon application.

- While creating a user, you can assign role-based access (such as General User, Manager, or Administrator).
- The process requires entering the user's personal details like name,

	<i>Borntfire Innovations Private Limited</i>	
---	--	---

contact information, username, and password.

- Once created, the user can log in to the Recon application with the assigned role and permissions.

This information is entered through the administrative interface of the Recon application.

User Profile - List

Displays a list of User Profile. The Screen will appear below,

RECON						
Home	Admin	Audit Inquiries	Credit Card	Debit Card	UPI Debit Card	RECON Parameter
Print Queue	MANIVANAN

Home Back

User Profile -Add

- Basic user information, including name, contact details, and login credentials, is added.
- All required fields must be entered.
- After submitting, the user's verify status is set to "Unverified."
- The unverified status requires verification.

 The screenshot shows the RECON application interface. At the top is a dark navigation bar with the RECON logo and several menu items: Home, Admin, Audit Inquiries, Credit Card, Debit Card, UPI Debit Card, RECON Parameter, and Print Queue. On the right of the navigation bar is a user profile icon labeled 'MANIVANAN'. Below the navigation bar is a white modal window titled 'User Profile - Add'. The form contains two columns of input fields. The left column includes fields for User Id (pre-filled with 'BF1015'), Bank Code, Branch Code (a dropdown menu), Employee Id, Mobile No (a dropdown menu), Login Low (a date field), User Disable Start Date, Password (a masked field), User Status (a dropdown menu set to 'Active'), Account Expiry Date, Role Id (a dropdown menu), and Upload Photo (a 'Choose File' button). The right column includes fields for User Name, Bank Name, Branch Name, Employee Name, Email Id, Login Hgt (a date field), User Disable End Date, Password Exp Days, Login Status (a dropdown menu set to 'Active'), Remarks, and Role Description. At the bottom of the modal are three buttons: Home, Submit, and Back.

2.2 Access and Role

- After creating a new user account, administrators have the ability to assign specific roles or responsibilities to the user. Roles define the permissions and access levels that the user will have within the system.
- Administrators can use the predefined roles or create custom roles tailed to the specific need of the business operations assigned to the users.

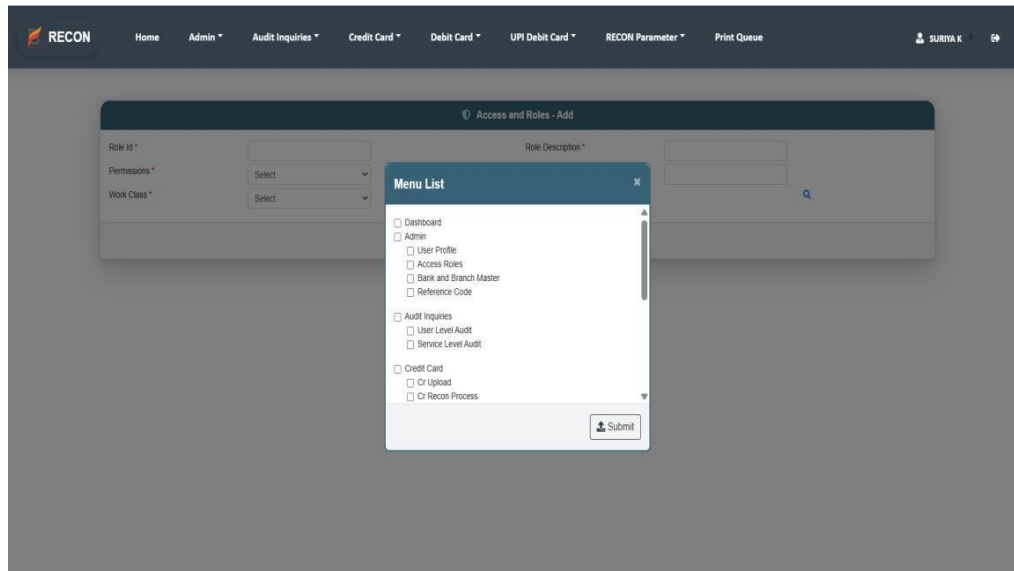

Access and Role – List

Displays a list of Access and Role. The Screen will appear below,

Access and Role – Add

- Add access and role fields, including: Role Id, Role description, Permission, Work
- In the Menu List, choose the menu for the particular role.
- All required fields must be filled.
- After submission, the role status changes to "Unverified".

The screenshot shows the RECON application interface. The top navigation bar includes links for Home, Admin, Audit Inquiries, Credit Card, Debit Card, UPI Debit Card, RECON Parameter, and Print Queue. The user profile 'SURYA K' is visible in the top right. The main form is titled 'Access and Roles - Add'. It contains fields for Role Id, Role Description, Permissions (a dropdown menu), and Work Class (a dropdown menu). A 'Menu List' modal is open, displaying a list of menu items with checkboxes: Dashboard, Admin (with sub-items User Profile, Access Roles, Bank and Branch Master, Reference Code), Audit Inquiries (with sub-items User Level Audit, Service Level Audit), Credit Card (with sub-items Or Upload, Or Recon Process), and a Submit button at the bottom.

This screenshot shows the same 'Access and Roles - Add' form after submission. The fields are now populated: Role Id, Role Description, Remarks, and Menu List. The Permissions dropdown is still set to 'Select'. At the bottom of the form, there are three buttons: Home, Submit, and Back.

Mandatory Field	User Action	Description
Role Id	Enter the Role Id that must be alphanumeric up to 100	Mandatory Free Text Alphanumeric
Permissions	Enter the Permission that must be alphanumeric up to 100	Mandatory Free Text Alphanumeric
Role Description	Enter the Role Description that must be alphanumeric up to 100	Mandatory Free Text Alphanumeric
Work Class	Enter the Work Class that must be alphanumeric up to 100	Mandatory Free Text Alphanumeric

Access and Role – View

Displays the view of the selected record from User profile.

 The screenshot shows the 'Access and Roles - View' form within the RECON application. The top navigation bar includes links for Home, Admin, Audit Inquiries, Credit Card, Debit Card, UPI Debit Card, RECON Parameter, and Print Queue, along with a user profile for SURYA K. The form itself has a title bar 'Access and Roles - View'. It contains several input fields: 'Role Id' with the value 'R0200', 'Permissions' with the value 'O', and 'Work Class' with the value 'Maker'. To the right, there are fields for 'Role Description' (ADMIN), 'Remarks' (REMARKS), and 'Menu List' (a list including Admin, User Profile, Access Roles, Bankbranchmaster, and Referencecode). At the bottom of the form are 'Home' and 'Back' buttons.

Access and Role – Modify

- Modify the fields for the Access and role on this screen.
- After modification, the verify status changes to "Unverified".
- The Access and role must be verified again after making modifications.

 The screenshot shows the 'Access and Roles- Edit' form within the RECON application. The top navigation bar is identical to the previous screenshot. The form has a title bar 'Access and Roles- Edit'. It contains several input fields: 'Role Id' with the value 'AUTH', 'Permissions' with a dropdown menu showing 'Select', and 'Work Class' with a dropdown menu showing 'Maker'. To the right, there are fields for 'Role Description' (AUTHORIZER), 'Remarks' (READ), and 'Menu List' (a list including Admin, User Profile, Access Roles, bankbranchmaster, referencecode, Audit Inquiries, User Level Audit, Service Level Audit, Credit Card, CR Upload, CR Recon Process, CR Report, Debit Card, Upload, Recon Process, and Report). At the bottom of the form are 'Home', 'Submit', and 'Back' buttons.

Access and Role – Verify

- Access and role verification must be completed on this screen.
- The process involves the maker-checker concept.
- After verification, the status changes to "Verified"

Access And Role - Delete

- This screen includes a deletion process.
- It displays the record selected from the Access and role

2.3. Bank and Branch Master

- In the bank branch master module, bank details such as bank ID, bank name, and other parameters are added. These details are then utilized in the user profile maintenance screen, where the bank code, bank name, branch code, and branch name are fetched from the bank branch master module.
- This ensures that the user profile screen reflects accurate and up-to- date bank and branch information, promoting consistency and efficient data management across the application.

Bank and Branch Master – List

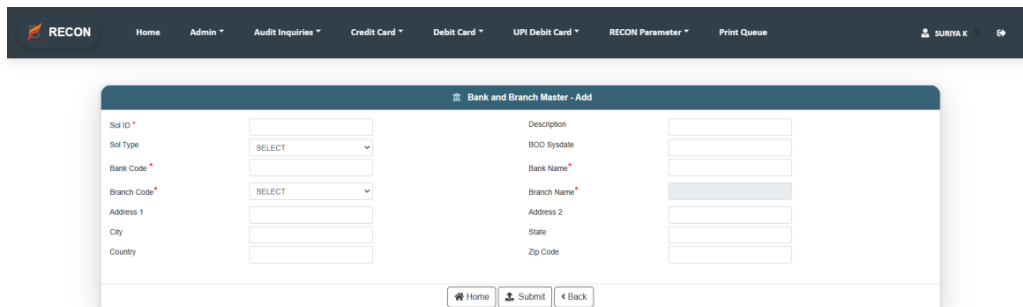

Displays a list of Bank branch master. The Screen will appear below,

The screenshot shows the RECON application interface. At the top is a dark navigation bar with the RECON logo and several menu items: Home, Admin, Audit Inquiries, Credit Card, Debit Card, UPI Debit Card, RECON Parameter, and Print Queue. On the right of this bar is a user profile icon and the name SURYA K. Below the navigation bar is a modal window titled 'Bank and Branch Master' with a list of data. The table has columns for Sol ID, Bank ID, Bank Name, Branch ID, Branch Name, City, Country, Status, and Select. There are two rows of data. The first row has Sol ID 01, Bank ID EWRWE, Bank Name WER, Branch ID 9002, Branch Name DEIRA, City 234, Country BOTSWANA, Status Verified, and a Select button. The second row has Sol ID 42, Bank ID WER, Bank Name WER, Branch ID 9001, Branch Name SHARJA, City, Country BOTSWANA, Status Unverified, and a Select button. At the bottom of the modal are 'Home' and 'Back' buttons.

Sol ID	Bank ID	Bank Name	Branch ID	Branch Name	City	Country	Status	Select
01	EWRWE	WER	9002	DEIRA	234	BOTSWANA	Verified	 
42	WER	WER	9001	SHARJA		BOTSWANA	Unverified	 

Bank and Branch Master – Add

- Bank and branch details are collected on this screen.
- All required fields must be filled.
- After submission, the role status changes to "Unverified".

Bank and Branch Master		
Mandatory Field	User Action	Description
Id	Displayed	Mandatory Free Text Alphanumeric
Bank Code	Displayed	Mandatory Free Text Alphanumeric
Bank Name	Displayed	Mandatory Free Text Alphanumeric
Branch Code	Displayed	Mandatory Free Text Alphanumeric
Branch Name	Displayed	Mandatory Free Text Alphanumeric

Bank and Branch Master – View

Displays the view of the selected record from Bank branch master

The screenshot shows the 'Bank and Branch Master - View' form within the RECON application. The form is divided into two columns. The left column contains fields for Sol ID (01), Sol Type (BRANCH OFFICE), Bank Code (EWRWE), Branch Code (9002), Address 1 (WER), City (234), and Country. The right column contains fields for Description, BOD Sysdate (02-09-2025), Bank Name (WER), Branch Name (DEIRA), Address 2, State, and Zip Code. At the bottom of the form, there are buttons for 'Home' and 'Back'.

Bank and Branch Master – Modify

Modify the fields for the Bank branch master on this screen.

The screenshot shows the 'BANK AND BRANCH MASTER - EDIT' form within the RECON application. The form is divided into two columns. The left column contains fields for Sol ID (01), Sol Type (BRANCH OFFICE), Bank Code (EWRWE), Branch Code (9002), Address 1 (WER), City (234), and Country. The right column contains fields for Description, BOD Sysdate (02-09-2025), Bank Name (WER), Branch Name (DEIRA), Address 2, State, and Zip Code. At the bottom of the form, there are buttons for 'Home', 'Submit', and 'Back'.

Bank and Branch Master – Verify

- Bank branch master verification must be completed on this
- screen.
- The process involves the maker-checker concept.
- After verification, the status changes to "Verified"

The screenshot shows the RECON application interface. The top navigation bar includes the RECON logo and several menu items: Home, Admin, Audit Inquiries, Credit Card, Debit Card, UPI Debit Card, RECON Parameter, and Print Queue. The user's name, AISHWARYA, is displayed on the right. Below the navigation bar, the 'Bank and Branch Master - Verify' form is visible. The form contains two columns of input fields. The left column includes fields for Sol ID (01), Sol Type (BRANCH OFFICE), Bank Code (02), Branch Code (9002), Address 1, City, and Country. The right column includes fields for Description, BOO Sysdate (02-09-2025), Bank Name (ABC), Branch Name (DEIRA), Address 2, State, and Zip Code. At the bottom of the form, there are three buttons: Home, Verify (which is highlighted with a blue circle), and Back.

2.4 Reference Code

- The reference code serves as a centralized repository for all dropdown options used throughout the various screens and forms. This approach ensures that dropdowns are consistently defined and managed in a single location.
- By adding and mapping dropdown options within the reference code, we can seamlessly integrate and reuse these options across different parts of the application.

Reference Code – List

Displays a list of Access and Role. The Screen will appear below,

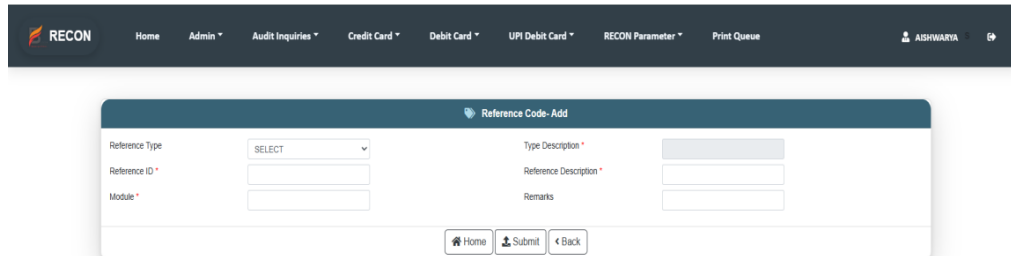

The screenshot shows the RECON application interface. At the top is a dark navigation bar with the RECON logo and several menu items: Home, Admin, Audit Inquiries, Credit Card, Debit Card, UPI Debit Card, RECON Parameter, and Print Queue. On the right side of the navigation bar, the user's name 'ASHWARYA' is displayed. Below the navigation bar is a modal window titled 'Reference Code' with a user icon. Inside the modal is a table with the following data:

Reference Type	Type Description	Reference ID	Reference Description	Select
B001	BRANCH CODE	9001	SHARJA	☒
B001	BRANCH CODE	9002	DEIRA	☒
B001	BRANCH CODE	9003	DUBAI	☒
C001	COUNTRY CODE	MAURITIUS	+230	☒
S001	SOL TYPE	S2	ADMIN OFFICE	☒
S001	SOL TYPE	S3	BRANCH OFFICE	☒
S001	SOL TYPE	S1	HEAD OFFICE	☒

At the bottom of the modal, there are two buttons: 'Home' and 'Back'.

Reference Code – Add

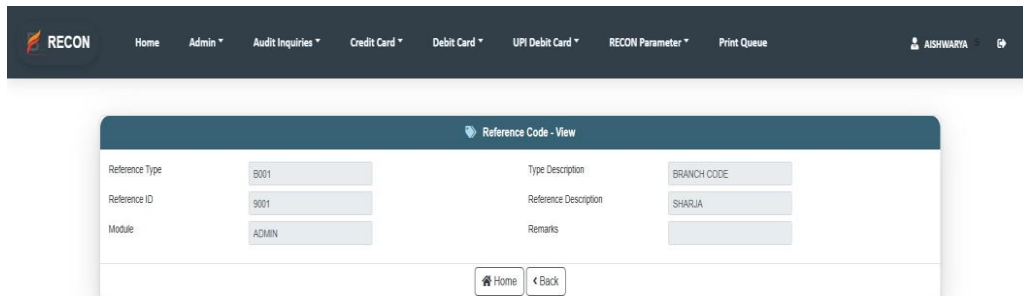

- Add data as parameters for use on other screens.
- All required fields must be filled.

Reference Code Master		
Mandatory Field	User Action	Description
Reference Type	Displayed	Mandatory Free Text Alphanumeric
Type Description	Displayed	Mandatory Free Text Alphanumeric
Reference Id	Displayed	Mandatory Free Text Alphanumeric
Reference Description	Displayed	Mandatory Free Text Alphanumeric
Module	Displayed	Mandatory Free Text Alphanumeric

Reference Code – View

Displays the view of the selected record from Reference Code.

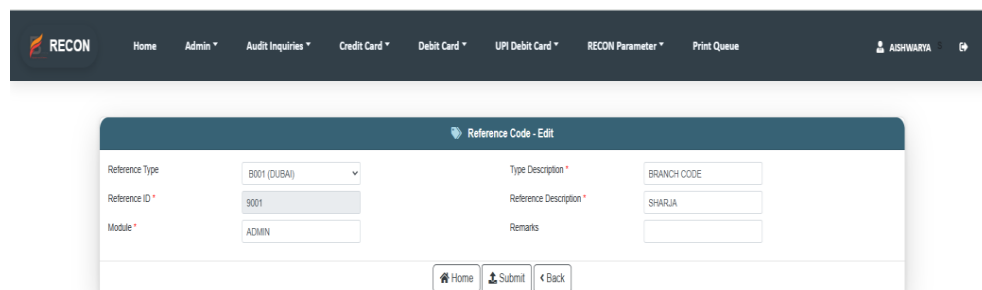

The screenshot shows the 'Reference Code - View' screen. The top navigation bar includes the RECON logo and menu items: Home, Admin, Audit Inquiries, Credit Card, Debit Card, UPI Debit Card, RECON Parameter, and Print Queue. The user profile 'AISHWARYA' is visible on the right. The main content area displays the following fields:

Reference Type	B001	Type Description	BRANCH CODE
Reference ID	9001	Reference Description	SHARJA
Module	ADMIN	Remarks	

At the bottom, there are buttons for 'Home' and '< Back'.

Reference Code – Modify

Modify the fields for the Reference code on this screen.

The screenshot shows the 'Reference Code - Edit' screen. The top navigation bar is identical to the previous screen. The main content area displays the following fields:

Reference Type	B001 (DUBAI) ▼	Type Description *	BRANCH CODE
Reference ID *	9001	Reference Description *	SHARJA
Module *	ADMIN	Remarks	

At the bottom, there are buttons for 'Home', 'Submit', and '< Back'.

3. Audit Inquiries

The Audit Inquiry module helps track and monitor all activities performed within the application. It ensures accountability, transparency, and compliance by maintaining detailed logs of user actions and system operations.

This module is divided into two sections:

1. **User-Level Audit**
2. **Service-Level Audit**

3.1 User-Level Audit

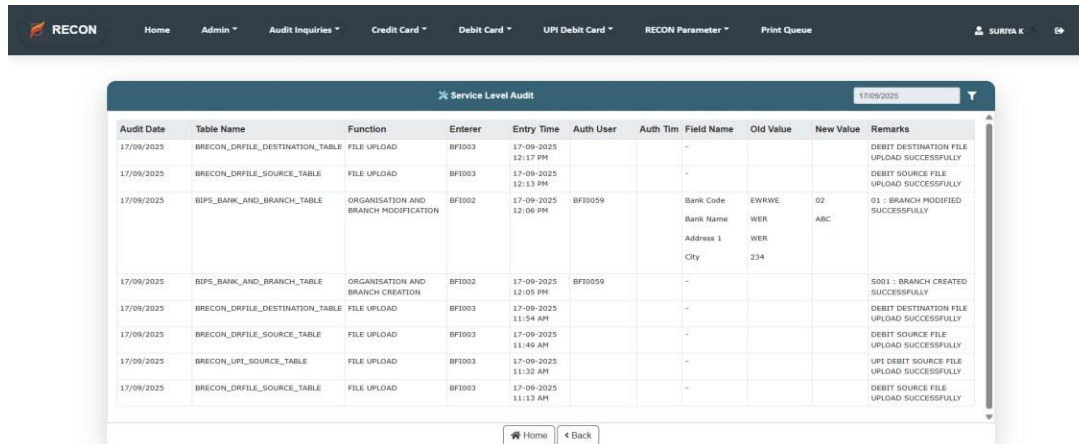

We can see the admin's to general users login and logout information. If the admin creates, modifies, verifies, or deletes users, those actions will also be shown here

4. Credit Card

The Credit Card Module provides functionality to manage and reconcile credit card transaction data.

It is divided into three sub-modules:

- Upload – Upload source and destination data files.
- Reconciliation Process – Match and validate uploaded data.
- Report – Generate and view reconciliation reports.

4.1 Credit Card Upload

Only Excel files (.xls / .xlsx) are accepted. Two types of files must be uploaded:

- Source Data File
- Destination Data File

System supports multiple file uploads at a time.

If the Source Data and Destination Data match successfully: Data is moved to the

	<i>Borntfire Innovations Private Limited</i>	
---	--	---

Main Table. A Reconciliation Report is generated automatically. If you attempt to upload the same Source Data file again, the system will display a Duplication Popup with two options:

Override → The new file replaces the existing file.

Cancel → The upload is canceled, and the existing file remains unchanged.

	<i>Bomfire Innovations Private Limited</i>	
---	--	---

4.2 Credit Card Reconciliation Process

The Recon Process ensures uploaded files are validated and matched properly. Displays Matched Records and Unmatched Records. Provides a Date Filter to view reconciliation results for a specific time period.

Proceed Options

1. Allows manual matching of records.
2. Once matched, the system runs reconciliation again.
3. Newly matched records are moved to the Matching Table.

4.3 Credit Card Report

1. The Report module provides detailed insights into reconciled transactions.
2. Currency Selection → choose between MUR, USD, etc. And Date Filter → select the reporting period.

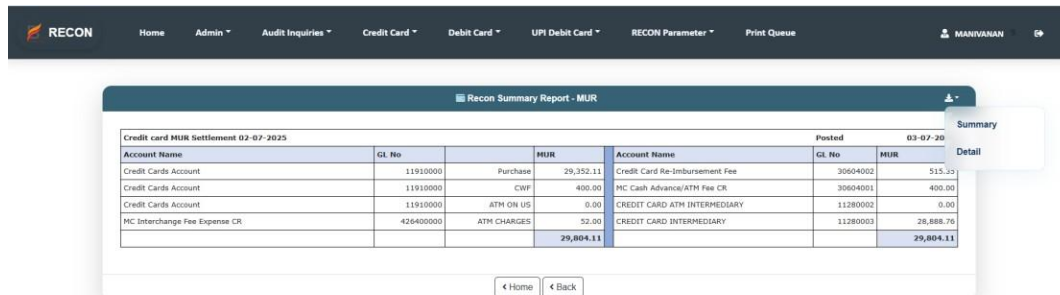

Download Options:

Summary Report → displays the sum of all records for the selected period.

Detail Report → shows individual transaction records.

The screenshot shows the RECON Credit Card Report form. The header includes the RECON logo and navigation links: Home, Admin, Audit Inquiries, Credit Card, Debit Card, UPI Debit Card, RECON Parameter, and Print Queue. The user is logged in as MANIVANAN. The form has a title bar "Recon Report". Below it, there is a "Cur" dropdown set to "MUR" and a "Recon Date" field set to "02-07-2025". At the bottom, there are buttons for "Home", "Submit", and "Back".

The screenshot shows the RECON Summary Report - MUR. The header includes the RECON logo and navigation links: Home, Admin, Audit Inquiries, Credit Card, Debit Card, UPI Debit Card, RECON Parameter, and Print Queue. The user is logged in as MANIVANAN. The report title is "Recon Summary Report - MUR". Below the title, there is a table showing the summary of transactions for the period 02-07-2025. The table has columns for Account Name, CL No, MUR, and Posted. The data is as follows:

Account Name	CL No	MUR	Posted
Credit Cards Account	11910000	Purchase 29,352.11	
Credit Cards Account	11910000	CWP 400.00	
Credit Cards Account	11910000	ATM ON US 0.00	
MC Interchange Fee Expense CR	42640000	ATM CHARGES 52.00	
		29,804.11	

At the bottom, there are buttons for "Home" and "Back".

5. Debit Card

The Debit Card Module provides functionality to manage and reconcile debit card transaction data.

It is divided into three sub-modules:

- Upload – Upload source and destination data files.
- Reconciliation Process – Match and validate uploaded data.
- Report – Generate and view reconciliation reports.

5.1 Debit Card Upload

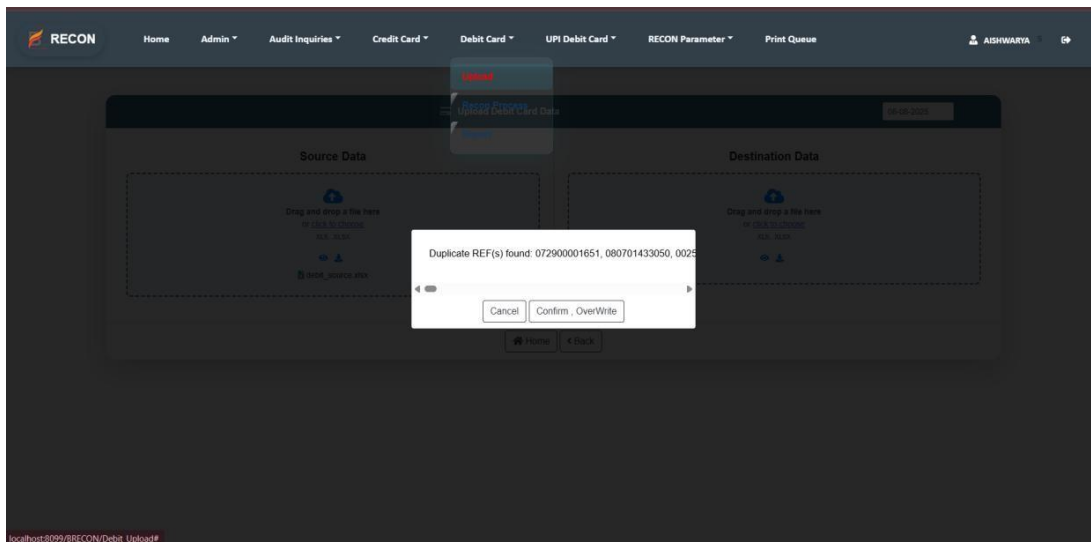

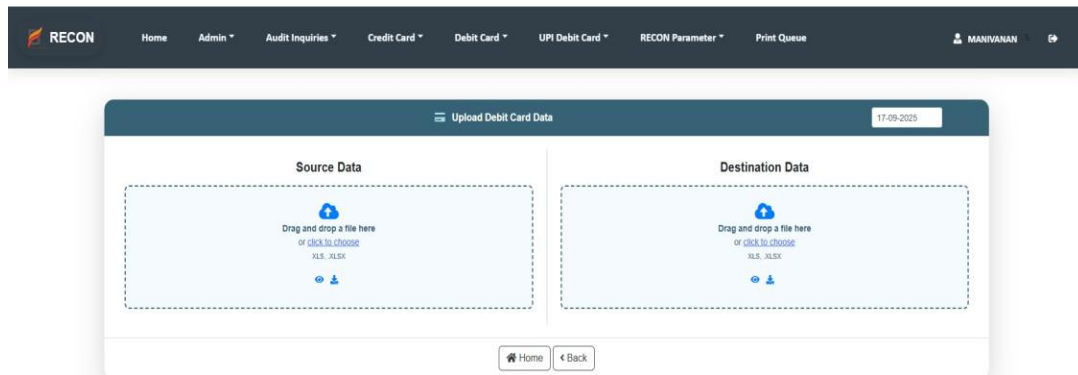

Only Excel files (.xls / .xlsx) are accepted. Two types of files must be uploaded:

- Source Data File
- Destination Data File

System supports multiple file uploads for destination data file at a time. If the Source Data and Destination Data match successfully: Data is moved to the Main Table. A Reconciliation Report is generated automatically. If you attempt to upload the same Source Data file again, the system will display a Duplication Popup with two options:

Override → The new file replaces the existing file.

Cancel → The upload is canceled, and the existing file remains unchanged.

5.2 Debit Card Reconciliation Process

The Recon Process ensures uploaded files are validated and matched properly. Displays Matched Records and Unmatched Records. Provides a Date Filter to view reconciliation results for a specific time period. Allows manual matching of records. Once matched, the system runs reconciliation again. Newly matched records are moved to the Matching Table.

5.3 Debit Card Report

The Report module provides detailed insights into reconciled transactions.

Currency Selection → choose between MUR, USD, etc. Date Filter → select the reporting period.

Download Options:

- Summary Report → displays the sum of all records for the selected period.
- Detail Report → shows individual transaction records.
- Markup Local → displays markup details for local credit card transactions.
- Markup IB → displays markup details for international/bank (IB) transactions.

6.1 UPI Debit Card Upload

Only Excel files (.xls / .xlsx) are accepted. Two types of files must be uploaded:

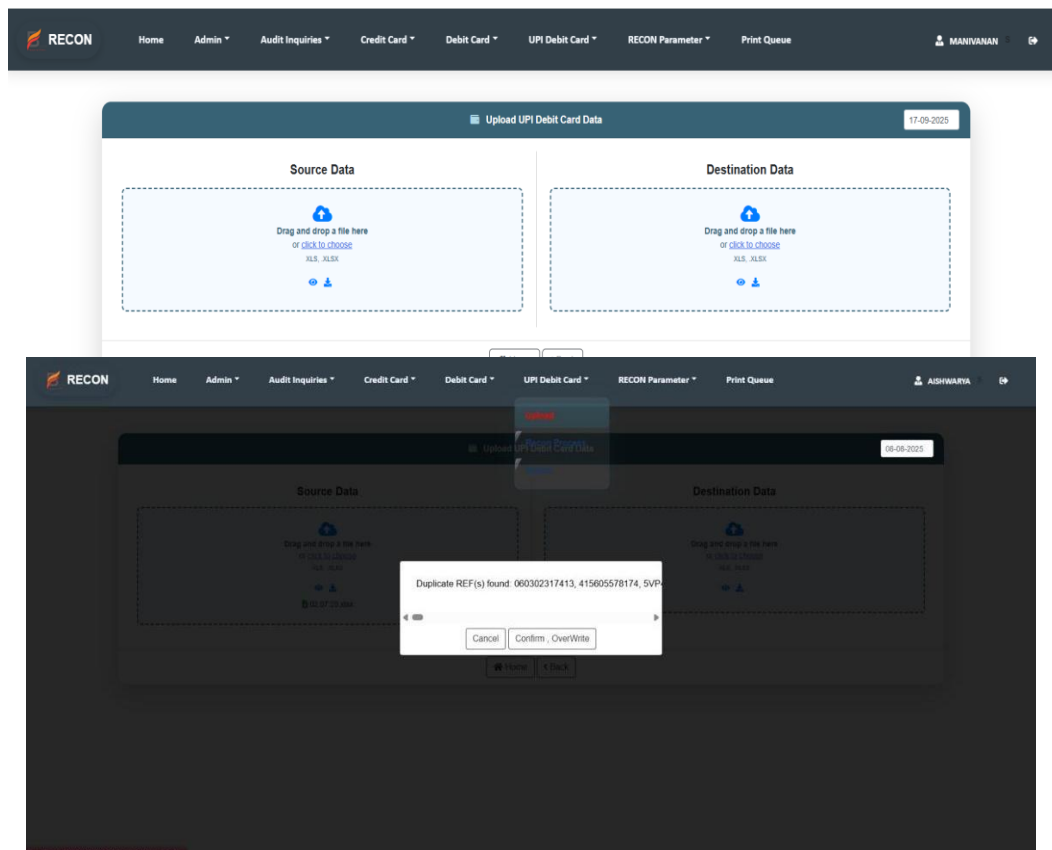

- Source Data File
- Destination Data File

System supports multiple file uploads for destination data file at a time.

If the Source Data and Destination Data match successfully: Data is moved to the Main Table. A Reconciliation Report is generated automatically. If you attempt to upload the same Source Data file again, the system will display a Duplication Popup with two options:

Override → The new file replaces the existing file.

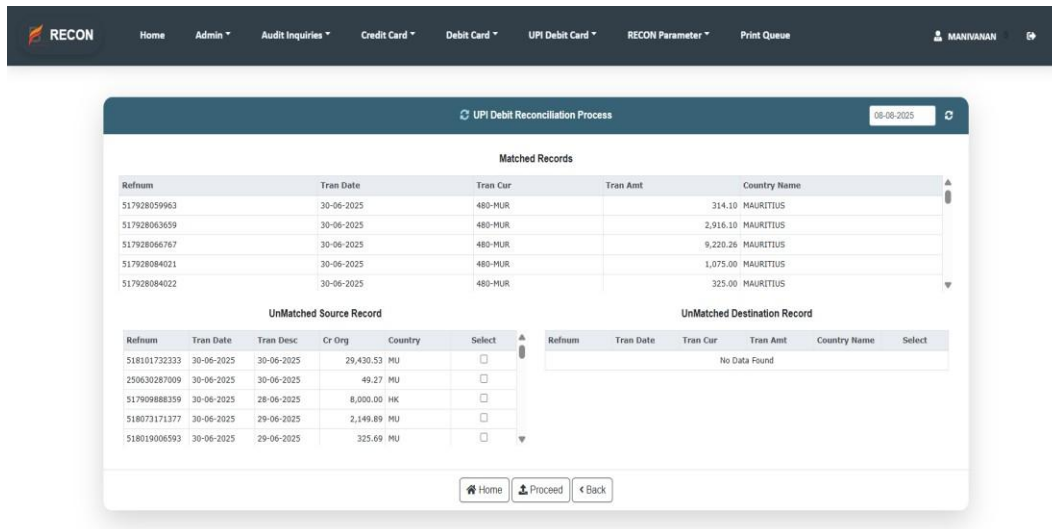

Cancel → The upload is canceled, and the existing file remains unchanged.

7.Recon Parameter

7.1 Rate Maintenance

1. The Rate Maintenance Module is used to manage currency exchange rates within the system. It allows users to define, maintain, and reuse different rate datasets for multiple currencies. View Currency Rates Displays the difference in rates between various currencies. Provides an overview of existing datasets for easy reference.
2. Add New Rate Used to create a new rate dataset for selected currencies.
3. Add New List Used to create a new list by reusing the most recently created dataset. Allows quicker setup without re-entering all rate details.
